

TP,SRO, SRO/TP,SSRO & SMLT ECMWF, start 10/04/2022 (00:00)

The figure displays a time series of hydrological variables for a specific region, likely the Iberian Peninsula, from 051022 00:00 to 141022 00:00. The variables shown are Total precipitation, Surface runoff, SRO/TP, Sub-surface runoff, and Snowmelt. The maps are arranged in a 10x5 grid, with each row representing a specific time point. The color scale at the bottom ranges from 1 to 90, with colors transitioning from light yellow to dark blue. The maps show the spatial distribution of these variables, with a significant increase in precipitation and runoff starting around 121022 00:00, indicating a major weather event.
